

Environmental Policy

Alliance Transport Technologies is firmly committed minimising the impact of our activities on the environment. We will achieve this by:

- Ⓐ Minimising our waste production by evaluating our operations and ensuring they are as efficient as possible;
- Ⓐ Actively promote recycling internally, by reusing as many products as possible, and if we cannot reuse, recycling as much as we can;
- Ⓐ Recognising our environmental duties under the Environmental Protection Act 1990 and by only using contractors with the appropriate documentation to remove any waste from our sites;
- Ⓐ Implement long-term waste management strategies to reduce overall waste production and increase the percentage of recycling in our overall waste amount;
- Ⓐ Aiming to reduce our usage of electricity, water and overall waste
- Ⓐ Reducing the amount of printing and aiming to become a paperless company

All employees are responsible for recognising their duty to reducing their carbon footprint at work, by following Alliance Transport Technologies goals to minimise their impact on the environment.
